The listing of contacts within this Directory is specific to those who utilize Nasal Techniques in one form or another. This listing is not inclusive of all the cranial doctors but represents those who have been willing to come forward.

Please take note that the purpose of this Contact Directory is to provide information. Contacts are constantly being updated. Nasalspecific.com strives to provide the most up to date and accurate information available. When new information is presented it is reviewed and then updated. This is a research and resource based web site only. Some Contacts may have a difference in view. I have provided this information here for the public to use so they may make the best decision available to them and for their loved ones.

The terms below were pulled from various different resources and are provided here to aid and assist individuals in their understanding. Throughout the years Endo-nasal Therapy has taken on many names and different variations of forms, which include: Bilateral Nasal Specific (BNS), Nasal Specific (NS), Endo-nasal Technique, Balloon Technique, Stober Technique, Nasal Cranial Release Technique (NCRT), Neuro Cranial Restructuring (NCR), Inner Opening Technique (ESR), Nose Whispering (NW), Central Nervous System Restoration (CNS) and a few others as well.

All of these techniques operate and originate out of the same principal. That is, using a type off blood pressure bulb affixed with an endonasal balloon to widen the nasal cavities in the nose, resulting in clear sinuses, reliving pressure upon the cranial plate joints, stimulating the nervous system, plus a whole lot more!

This Directory is privately funded and was created in good faith and in the hopes that not only Balloon Adjustment Therapists could keep in contact with each other, but also as a source of knowledge, and as a Directory to serve those who suffer from sinus problems and other varying dysfunctions and disabilities. For those who seek help and for those who seek relief.
