Hello Mr. Jones,

My whole family has greatly benefited from the treatments Dr. Stober had done. Also, I know that there are so many other amazing things that the nasal specific method can do too. Thought I'd share my families experiences by this method.

I was only about 5 years old when I last had a treatment, and there was only a concern with my narrow pallet. But my middle sister had a more obvious concern with her forehead, face, and jaw not being set right. From birth until 4 years old my mother was told that she was going to grow up being deformed and that it would effect her brain functions. But she miraculously found Dr. Stober and he straightened everything out so quickly. She turned out totally normal both physically and mentally. My mother said that on that first visit, she heard my sisters head and facial bones pop in multiple places, just like a chiropractic adjustment!

As for my mother, it only took 1 treatment to straighten her crooked nose that she had since teenage years, and improving her eyesight to where she had to change her prescription!

The latest visit to a 'nasal specific' doctor was for my youngest son last year, who's been diagnosed with Langerhans cells histiocytosis (autoimmune disorder) by the single large bone lesion on the right side of his head (7 cm). Well, simply the swelling and the hole being there was enough to start causing my son's head to grow a little lop sided. With 3 treatments his head and eyes became perfectly symmetrical, and even the doctors who evaluated his xrays/MRIs could hardly believe that it really happened. They said there's no more concern about him ending up with a semi dysfunctional brain like other patients typically do when developing that kind of deformity.

Guess that's all I can think of right now. I wish you continued success with getting those resources and contacts out there for all those who can greatly benefit!

I was involved in a terrible automobile accident in 1976. When I awoke from a coma, I was deaf in my right ear and suffered a partial dislocation of my right shoulder and fracture of the 4th and 5th thoracic vertebrae. I suffered with thoracic pain and deafness for 23 years.

In 1998 I was suffering from lower back and rib injuries from a go cart accident and was not responding to chiropractic care. I had my first treatment on 1/17/1999. The first inflation restored my hearing 100%. I was in shock and cried for about an hour. The next day my left ear improved. For the next month my entire frame from my feet to my neck started to crack and pop and snap and I have not suffered the horrendous back and rib pain since that time.

I was so pleased with my results I immediately took my wife and 4 children along with my brother in law for treatment. My wife has not had a sinus infection, my son's teeth straightened out and my brother in law's sleep apnea improved dramatically.

On June 15th 2004 I had surgery to clear my Cortaid artery. After the surgery a blood clot formed, a piece broke off and caused a massive right hemisphere stroke that left me completely paralyzed on my left side. I could not walk, talk or see out of my left eye or hear out of my left ear. When I finally got home my good friend flew up from LA and treated me. Within 5 minutes I could begin to walk talk and see. It has been 5 years and I am about 90% normal.

I owe it all to balloon therapy, as a matter of fact I take treatments about 1 time per month or when I begin to have difficulty talking.

Yours Sincerely

Dr. Musich
